📜 [UiPath Certified Professional](#)

Skills

</> Development

TypeScript, JavaScript, Node.js, Python,
Google Apps Script, Java, C#, Shell Scripts,
ReactJS, Vite, Strapi, Drupal, Flask

🎯 Quality Assurance

Playwright, WebdriverIO, Selenium, BDD,
JMeter, Jest, JUnit, Mocha, Tricentis Tosca,
BrowserStack, REST, GraphQL, UIPath, UI
Automation, API Automation

🔄 DevOps

CI/CD, Git, GitHub Suite, Atlassian Suite,
AWS Suite, Jenkins, Linux and Windows
Servers, Virtual Machines, Nginx, Ansible,
Splunk, Cloudflare, Infrastructure as Code

🛠 Misc

GenAI, Agentic AI, Shift Left, Scrum

Summary

I build platforms and workflows that help teams ship products safely and confidently.

A software engineer with **15+ years of experience** in **quality engineering** and **test automation**. I enjoy pushing software to its boundaries, investigating its inner workings, and looking for bugs to squash and cracks to patch up.

Experience

NCS Australia

Australia, NSW

Automation Manager

Jul 2025 – Present

- Helped shape the **technical direction, delivery planning and effort estimation** across multiple teams' automation initiatives.
- Partnered with business stakeholders and potential clients to **identify automation opportunities and define possible solutions** through proof of concepts.
- Provided **technical guidance, mentoring and code reviews** to fellow engineers.
- **Supported technical assessments for software engineering candidates** as part of the hiring process.
- Continued contributing to **automation architecture and implementation** while taking on consulting delivery responsibilities.

Senior Automation Engineer

Nov 2022 – Jun 2025

- Designed and developed **automated solutions for functionality and pricing validation** for multiple insurance pricing platforms.
- Led **technical estimation and delivery planning** for the QA team's automation initiatives.
- Identified and implemented **opportunities to automate manual testing and business processes**, improving the efficiency and consistency of validation activities.
- Took ownership of the quality engineering team's **technical design and code review responsibilities**.
- Created and maintained **documentation for automated workflows and testing processes**, providing a shared reference for technical and business stakeholders.

Staizen

Singapore

Technical Lead

Jan 2021 – Oct 2022

- Established and integrated **software quality standards into engineering tooling**, promoting consistent practices across projects.
- Worked with engineering management to **identify and implement enterprise-level process improvements**.
- Provided **technical guidance and direction** for QA teams across projects.
- **Conducted technical assessments for software engineering candidates** as part of the hiring process.

Senior Software Engineer

Mar 2021 – Dec 2021

- Designed and developed **automated tests for web, mobile and back-end applications**, supporting product development throughout the software lifecycle.
- Built the **testing foundation tools from scratch**, including usage and contribution documentation within the first six months.
- Created **CI pipelines for automated test execution and quick feedback loop** to integrate automated testing into the development workflow.

Personal Projects

npm: @iamkenos/kyoko

Playwright & CucumberJS mixed with presets and additional features.

npm: @iamkenos/iris

Test API endpoints with Axios & Jest using a collection of custom matchers and built-in utility functions.

blog: dandelionwishing.com

A content-managed blog built with ReactJS, Vite, and Strapi.

Experience

Singapore Exchange

Singapore

QA Engineer

Sep 2018 – Mar 2021

- Developed **UI and API test automation** for the public website's headless content management system and an OTC trading platform.
- Enhanced and maintained **testing foundation tools used across multiple projects**, while advising engineers on automation and testing approaches.
- Supported **feature development, code reviews and technical assessments** to contribute to software quality beyond test execution.

Optimum Solutions

Singapore

Senior Software Testing Engineer

Jun 2017 – Sep 2018

- Developed **UI and API test automation** for an online hedging platform.
- Established the project's **test automation framework within the first month** providing the foundation for automated testing.
- Built a **JavaFX test execution tool and CI pipeline**, improving test execution and integration into the development workflow.

DISYS

Singapore

Senior Test Engineer

Dec 2015 – Jun 2017

- Developed **UI automation tests for a government licensing platform** used across Singapore government agencies.
- Enhanced and maintained the project's **test automation framework**, while contributing to code reviews and test strategy.
- Built and later ported a **keyword-driven automation tool** to enable non-developers to create automated tests, with the solution subsequently adopted department-wide.

Helius

Singapore

Software Engineer

Mar 2014 – Dec 2015

- Developed **UI automation and automated performance tests** for DBS Bank's public website.
- Built **Excel and VBScript tools** to streamline testing activities and served as the team's subject matter expert for the application under test.

Pointwest

Philippines, Quezon City

Software Engineer

Feb 2011 – Feb 2014

- Developed **UI automation using Selenium and Java** for Home Depot's back-office inventory system and executed manual testing for Delta Air Lines.
- Served as an **offshore point of contact** and conducted department-wide training on automated testing with Selenium and Java.

Education

AMA Computer College

Philippines, Makati City

Bachelor of Science in Information Technology

Sep 2010

- Scored 1.0 (equivalent to 98-100% rating) on both Software Engineering and System Analysis & Design courses.
